-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The final rejection of 10/4/2005 has been vacated/ withdrawn and replaced with the following non-final rejection. The vacating/withdrawing of the final is due in part to newly discovered prior art.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Tomasseti, Jr. et al (3999227)(TM). TM discloses a dome shaped structural system and the method because the patent discloses

- Providing a compression ring at 16; see figures 1-2 and 5-6
- Providing a lower ring 24/26, shown in figure 6, with larger but similar shape to the compression ring, by the step of splicing together lower ring sections to form the lower ring; figures 4 and 12
- providing ribs 14 configured to extend between the lower and the compressions rings; the material of construction has been considered a matter of choice; one of ordinary skill in the art would have appreciated employing any material commensurate with the use function and intended purpose of the dome
- connecting the ribs with the lower ring and the compression ring to form a dome shaped structural system

- the compression ring has a plurality of rib mounting flanges from ember 28; see figures 2-3
- the lower ring has a plurality of rib supporting members; see figure 7 at the distal end of element 14

Claim 10 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 1,3-6 and 12 are allowable over the prior art of record.
